

GTC CM600 600 AMP AC/DC CLAMP METER

With its auto-range and high sensitivity, the CM600 current clamp meter allows the measurement of AC/DC currents with a resolution down to 0.1 A, and up to a maximum of 600A, making it ideal for testing all kinds of loads such as found in: electric motors, fuel pumps, charging systems, starter currents, alternators, etc. The CM600 features a small and narrow jaw, which can accept cables up to 25.4mm in diameter and be used in confined spaces, wire bundles, and small gauge wires. Other features include up to 600 Volts AC/DC voltage and resistance measurement functions, continuity test (with buzzer), and display hold and peak detector functions.
