

MITYVAC FLUID EVACUATOR & DISPENSER

At the push of a button, this versatile unit changes from vacuum to pressure for evacuating or dispensing fluids. This functionality makes it ideal for draining tanks or reservoirs then pumping the used fluid back out for easy disposal. Multiple units work great, simply evacuate used fluids with one unit, and then quickly refill with new fluid from a second. For superior mobility, the 07201 utilizes a manual pump, so compressed air or electricity is not required. Accessories are included for draining engine oil or transmission fluid directly through the dipstick tubes.

- Evacuates or dispenses at the push of a button
- Convenient manual pump operation
- Integrated 8.8 liter capacity reservoir

The Fluid Evacuator has an automatic shut off feature so you can leave the unit unattended, just pump and let it do its thing.

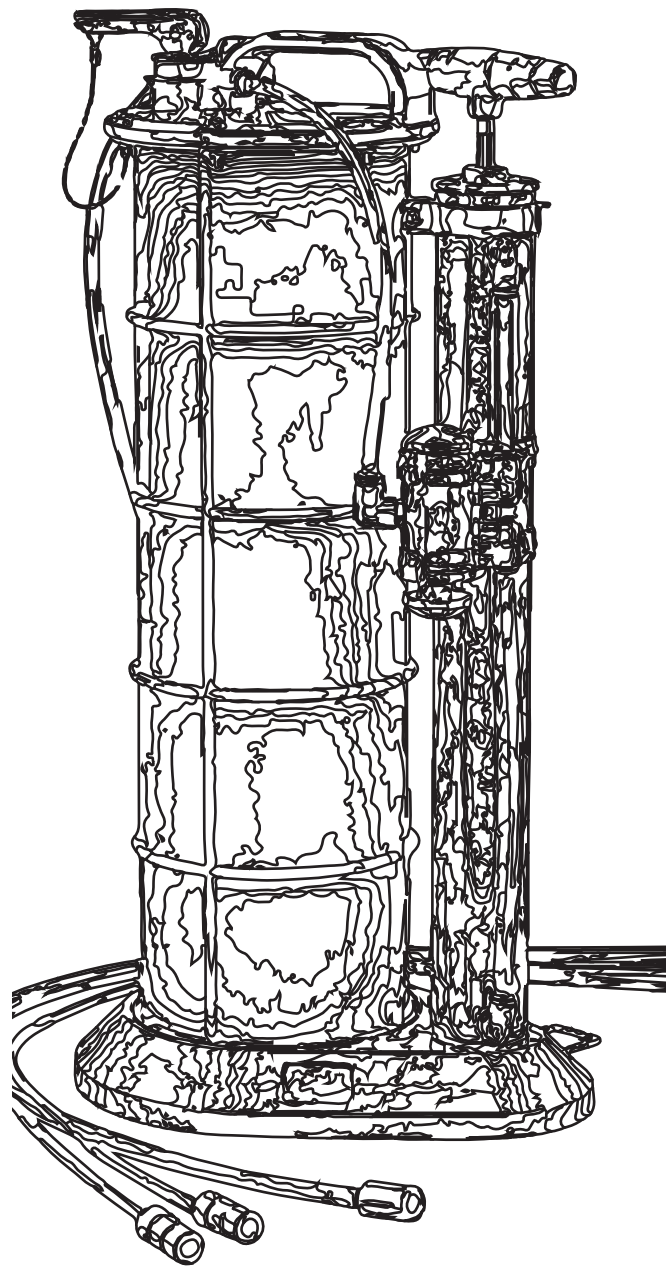

Secure and stable with a large base with an additional retractable foot stabilizer during pumping prevents ugly messes.

The hand pump produces maximum efficiency, in most cases all that is required is 3-5 pumps to completely empty a crank case

Constructed of tough easy to clean polyethylene, ensures you can evacuate a vessel quickly clean the reservoir and refill efficiently

In situations where the capacity is unknown or unavailable you are able to return the exact same amount of fluid as you extracted

The quick drain pour spout has a huge 35mm diameter, enabling you to quickly discard of extracted fluid
