

MITYVAC FLUID EVACUATOR

Vacuum is created quickly and efficiently by manual pump operation, offering superior mobility by eliminating the need for electricity or compressed air. The MV7400 is ideal for draining fluids from reservoirs on boats, RVs, ATVs, snowmobiles, farm equipment or motorcycles. Includes accessories for draining engine oil or transmission fluid directly through the dipstick tubes.

Convenient manual pump operation
Integrated 7.3 liter capacity reservoir
Large base with foot stabilizer
Durable, chemical resistant polyethylene construction
Automatic overflow prevention
Quick-drain pour spout

For maximum portability, the unit uses a hand so no need for compressed air or power

With a retractable foot stabilizer for additional stability during pumping

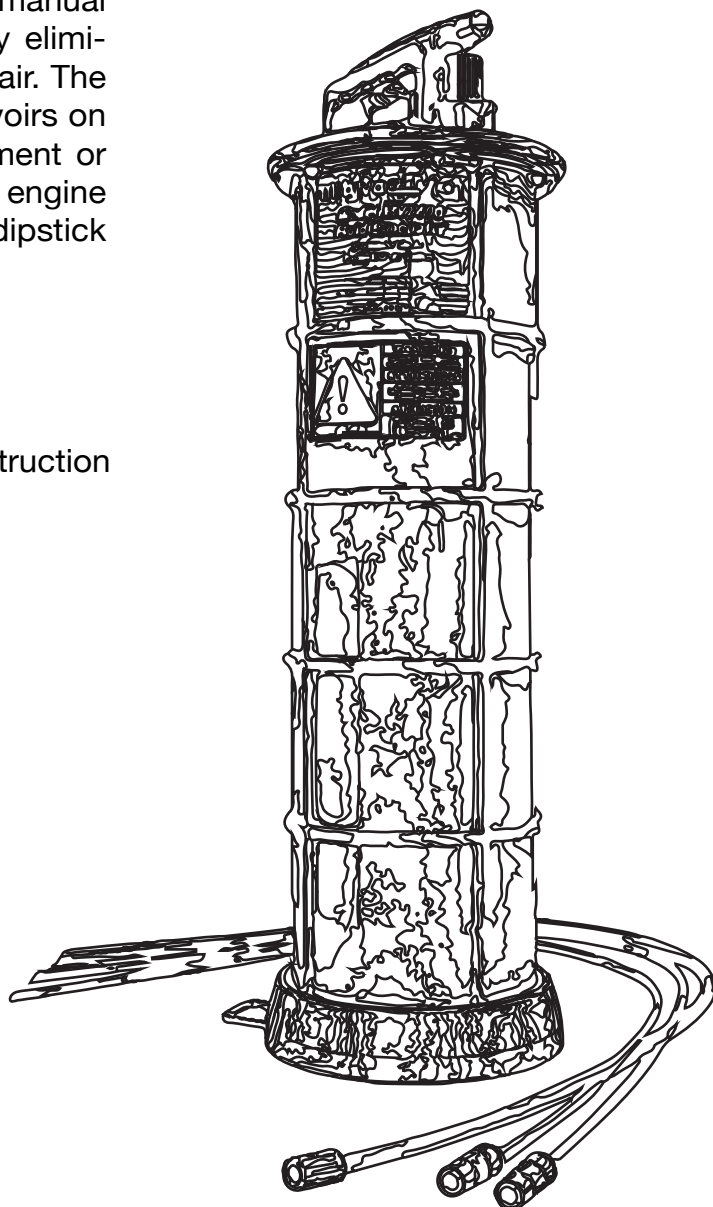

Constructed of tough easy to clean polyethylene

In situations where the capacity is unknown or unavailable you are able to return the exact same amount of fluid as you extracted, using the level indicators on the side of the unit

The quick drain pour spout has a huge 35mm diameter, enabling you to quickly discard of extracted fluid

The Fluid Evacuator has an automatic shut off feature so you can leave the unit unattended, just pump and let it do it's thing.
