

# FOX AND HOUND WIRE TRACER

The FF310 is a specially designed tool for tracking, tracing and identifying wires, short and open circuits, broken wires and current leaks on any electrical circuit with voltages from 6 to 42 Volt DC, and is used by technicians worldwide in an ample range of applications such as automobiles, truck trailers, tractors, farming equipment, boats, forklifts, motorcycles, all-terrain and recreational vehicles.

The 42V ready FF310's wide working voltage range, automatic short/open detection, adjustable sensitivity levels and flexible antenna probe enables the technician to troubleshoot a complete array of common electrical problems without having to untie wire harnesses or remove body panels.

## Transmitter Specifications

**Indicators:** Green LED for power On and Open circuits. Red LED for short circuits.

**Power source:** 9-volt alkaline battery. Duracell type MN1604 (included)

**Battery life:** approx. 25 hrs.

**Connector:** Two 5 A alligator clamps with auto polarity and 18" long cable.

## Receiver Specifications

**Sensitivity:** Three user selectable sensitivity levels (low, medium and high).

**Receiver probe:** Flexible 8" goose-neck insulated steel probe.

**Indicators:** Green LED indicator for power on and open circuits. Red LED indicator for short circuits.

Variable flashing and modulated audible signal.

**Power source:** Standard 9-volt alkaline battery. Duracell type MN1604 (included)

**Battery Life:** approx. 25 hrs. Auto Power Off.

## Electrical Specifications

**Input Voltage range:** 6 to 42 Volt DC.

**Input DC Current:** Unlimited (internally limited)

**Voltage output:** 5 Volt DC maximum

**Current Output:** 100 mA DC rms maximum

- ✓ Wire identification
- ✓ Short circuit tracing
- ✓ Open circuit tracing
- ✓ Wire / Circuit tracing
- ✓ Ground checks

## Kit Includes

- ✓ Transmitter
- ✓ Receiver
- ✓ Fuse block adapters
- ✓ Computer safe circuit tester
- ✓ Hard case
- ✓ User's Manual
